**Subject:** Errata to Consequences

Ladies and Gentlemen,

please find enclosed Errata to my previous document Consequences - motion/request for notices to the case,

Above document was entered yesterday to docket # 2008-196-E and sent to you via e-mail. It is also a reply to

SCE&G document entered on 2009-03-19.

There are important for PSC session, set for tomorrow - 2009-03-25 in docket # 2008-196-E.

We have to save water for us in SC and hundreds of millions of \$\$ /dollars for unnecessary transmission lines

Sincerely

Joseph "Joe" Wojcicki

**ERRATA TO DOCUMENT: CONSEQUENCES dated March 23, 2009**

**Please do make correction/ addition to my Request for legal, formal or informal notices about facts listed in yesterday's document called Consequences:**

6. **Is:** *In my first Request for Additional Information (discovery stage - September 22, 2008), I did specifically suggest scientific and professional answers for listed cooling water problems. The Applicant did fail to answer in the professional way. Then I did another research, by myself, using also mostly Westinghouse and some SCE&G available materials to do calculate enormous volume of the water to be evaporated by reactors in the future. The results support my concept of AOL. Consequences: Wrong PSC decision accepting Jenkinsville location*
- Should be:** *In my first Request for Additional Information (in discovery stage, document dated August 19, 2008), I did specifically suggest scientific and professional answers for listed cooling water problems. The Applicant did fail to answer in the professional way. Applicant's answer, delivered because of my intervention done on September 22, 2008, was not entered to Docket # 2008-196-E and did fail to deliver required information. Then I did another research, by myself, using also mostly Westinghouse and some SCE&G available materials to do calculate enormous volume of the water to be evaporated by reactors in the future. The results support my concept of AOL. Consequences: Wrong PSC decision accepting Jenkinsville location*
- I believe Applicant finally submitted this paper in December 2008 at the hearing. Applicant's Answer has no required data and, of course was entered not on time. Just to compare – Applicant's answer to Ms. Greenlaw request was done timely. Also note the in the aspect of forecasting necessary in future MWs of 24/7 nuclear generated power cannot be used to simply balance residential loads (even for a million of new residents) because they are not base 24/7 steady demand. The Application cannot be approved without doing scientifically required analysis. You did not get a help from outside SC experts.
- .....
- .....

AOL is the location which has solid scientific calculations and analysis. And nobody rebutted it since November 10, 2008.

WHEREFORE for the foregoing reasons, I, Joseph "Joe" Wojcicki – intervenor in this case hereby urges the Commission to change the Order accepting Motion dated November 10, 2008, to request SCE&G to do a rework of the Application to new location, as well as do **make all notices that might be used in a next stage of the Application review.**

Respectfully submitted:

Joseph Wojcicki
